

Over 80 pages of data visualized in a single page, with no loss of information, but greater insight.

Automated analysis

Visualizations created automatically based on unsupervised analysis

Visual exploration

Hosted visuals link summaries with underlying raw data

Annotations

Allowing users to graphically comment on visuals and share them

Mobile/tablet ready

Generate native output for Android, iOS, Microsoft Office, videos, etc.

Monitoring ATM performance

A real time visualisation that monitors ATM transactions of a bank across the country

Custom built

Gramener's data visualization platform supports flexible customization of the visuals to suit your domain.

Instead of an out-of-box solution that limits the charts, Gramener works with clients to design the representation that fits the domain best.

For example, below is a breakup of ATM transaction errors by geography, ownership, transaction and error type.
