

Senior Analyst

We help consult and deliver solutions to organizations where data is at the center of decision making. We have our product and services which help makes this easier: by analyzing and visualizing large amounts of data. We are looking out for people who can understand our capabilities, client scenarios across industries and recommend value driven solutions to delight our customers.

What will you work on?

You will help our clients solve real-world problems by tracing the data-to-insights lifecycle: understanding business problems, making sense of the data landscape & footprint, performing exploratory & deep analytics, extracting actionable insights, and helping put together an execution roadmap.

You will also be contributing to the development of our proprietary analytics product, repository of solutions, and help other teams leverage analytics to aid with better consumption of data. Additionally, you will mentor and lead a team of analysts to offer exceptional solutions to clients across domains.

What's needed to be successful in this role?

You must have a strong background in any quantitative discipline (Statistics, Mathematics, Economics/Operations Research etc.) from a reputed institute, with a good grip on analytical tools/languages like R, SAS, Python. You must be able to work across different domains and get a quick sense of the business processes & flows, in order to translate business problems into the data realm and identify pertinent and meaningful solutions.

You must have a flair for taking a leadership role in Gramener's Data Consulting & Analytics practice to conceive strategic growth plans, map closely with clients and scale & groom a team of expert analysts. If you possess exceptional communication skills, both verbal and written, with a strong urge to learn, iterate and innovate, you may be the person for us. If you love numbers, are passionate about applying data analytics to solve business problems and like working in an extremely dynamic, fast paced environment, we may be the company for you.

You can work out of our Hyderabad (Hitech City) or Bangalore (Indira Nagar) offices.
